

## SILLY PUZZLES

- 1) Add five line segments to the following to get ten. Do not move the given segments.

- 2) Move the four given segments to get ten.

- 3) How can half of five be four?

- 4) Change the equation into a correct equation by altering the position of only one piece:

$$VI = II$$

- 5) How does 4/5's of seven become even?

- 6) 1/3 of 6 + 2/3 of 11 equals seven? How?

Hint: 1/3 of six plus 4/6 of eleven

Hint: 1 of 3 from six plus 4 of 6 from eleven

- 7) Change the equation into a correct equation adding a single line segment somewhere:

$$5 + 5 + 5 = 550$$

- 8)  $\frac{\sin x}{n} = 6$  Why?
